

# Defense Supply Chain Cybersecurity Resiliency Seminars

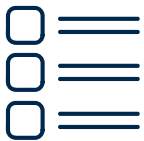

## DEFENSE CYBERSECURITY ASSURANCE PROGRAM

### WHO SHOULD ATTEND?

- Companies currently doing or looking to do business in the Department of Defense supply chain
- Companies wanting to learn about the Cybersecurity Maturity Model Certification

### AGENDA HIGHLIGHTS

The DoD is launching a cybersecurity standard and certification program in 2020. Once this goes into effect, self-attestations will no longer be sufficient to bid on DoD contracts and it will affect all companies doing business in the defense supply chain, regardless of the type of business. Let us assist you in understanding the new certification requirements and how to remove the barriers to entry into the DoD supply chain.

What are the requirements?

How do I get certified?

What does that mean for you?

Additional Resources
